

BizSmart Coach

In 2018, to put the next generation of idea makers and world shakers, in charge of their own business skills and leadership development, Camp BizSmart launched an innovative, first-of-its-kind artificially intelligent mobile app with patented technology by LeaderAmp called ***BizSmart Coach*** (BSC) to provide aspiring young entrepreneurs “C-Suite” level executive coaching.

BizSmart Coach has powerful features including voice to text journaling and a 360 degree self-assessment to establish a baseline of their current leadership abilities and skills such as grit, optimism, growth mindset and charisma.

Backed by research on the best leaders in the world, it customizes a unique new kind of “Clone Coaching” tailored to each student’s goals and skill levels, allowing them to receive this coaching where and when they want and need it. Students will decide when to ask for help by certified leadership coaches who will have a private, elegant view into each young entrepreneur’s journal, so that the coach can personally praise, nudge, or otherwise help the aspiring entrepreneur learn from his or her entrepreneurship experiences.

BizSmart Coach will offer new coaching services after camp, so each future business leader can build a portfolio of leadership skills and experiences to deepen their development, and measure their progress at school, at home and in the community.
