

Dear BizSmart campers and families:

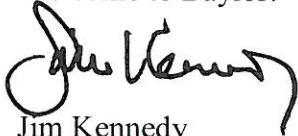

Baylor School is thrilled to be hosting Camp BizSmart, and we look forward to welcoming you to campus next week. Baylor has a long tradition of outstanding summer programs, but the buzz around BizSmart is unique in our experience because the experience is going to be unique. Baylor's 690-acre campus will provide campers ample opportunity to stretch their muscles as well as their minds.

The on-campus activity will be enhanced by Baylor's proximity to Chattanooga's Innovation District, where BizSmart campers will have the chance to rub elbows and match wits with folks who push the innovation envelope every day.

Back on campus, they will meet teacher/counselors who engage Baylor science students in university-level research in a variety of disciplines, including trailblazing freshwater research in partnership with the Tennessee Aquarium Conservation Institute. The teaching and learning going on here is astonishing, and BizSmart campers will be experiencing it wrapped up in the fun of summer camp.

It promises to be a memorable two weeks, and I hope I will get to meet all of you along the way.

Welcome to Baylor!

Jim Kennedy

Director of Admission and Enrollment
